SKILLS

| HTML | Css | Bootstrap | Tailwind Css |

| Javascript | React.js | Node.js | Express.js |

| MongoDb | Rest API |

PERSONAL PROJECTS

Student Resource Management (02/2025 - 03/2025)
- This project was assigned by our college as part of our academic curriculum. Our instructor divided the class into small groups, and I worked with a team of 5 members. My primary role in the project was as a Backend Developer. During the development process, I learned about database design, API creation, and how to integrate them with the front-end.

To-Do APP (03/2025 - 03/2025)
- This is a Front-End web application built using React.js as part of my learning and practice journey. The goal of the application is to help users easily create, manage, and organize daily tasks in a structured and intuitive interface.

Color Generator App (04/2025 - Present)
- simple front-end project built with JavaScript to practice DOM manipulation . Users can generate random RGB or Hex color codes , see the background change instantly, and copy the color using a **"Copy Color"** button.
- **Live Link::** https://cutt.ly/nrl5DIoR

Personal Website (04/2025 - 04/2025)
- A portfolio site showcasing my journey as a Front-End Developer and MERN Stack learner. The website highlights my technical skills, featured projects, and personal growth as a programmer. It reflects my passion for clean UI design, problem-solving, and my long-term goal to become one of the world's top developers.
